

# Challenge Yourself

# Gatton Honors Pathways

“The Social Entrepreneurship Scholars pathway pushes students to tackle real-world business problems and create solutions. Because of amazing opportunities like the Global Social Innovation Challenge, we are able to partner with people around the globe to create a better world together.”

-Shelby Simpkins,  
*Social Entrepreneurship Scholar*

## Why apply to be a Gatton Honors Pathway student?

Gatton’s unique Honors Pathways – designed for high achieving students – deliver specialized trajectories for today’s business marketplace. Gatton Honors Pathways are focused on developing leaders through innovative business practices rooted in community development and sustainability. Benefits include:

- Priority registration
- Personalized academic advising with the Director of Pathway Programs
- A customized experiential education
- Smaller cohort classes to enhance your academic experience
- Member of the prestigious Lewis Honors College

## Apply for a Pathway at [uky.edu](http://uky.edu)

Application deadline is **December 1**

Interested students must apply as an incoming freshman and must also select a Gatton major on the UK application.

**blue means BUSINESS**

**UK** Gatton College of Business and Economics

## Global Scholars

A specially designed academic curriculum in partnership with comprehensive co-curricular programming that develops the next global business leaders. All Global Scholars spend a full semester abroad and complete an International Business Minor. These students are prepared to lead in an interconnected global community.

## Social Entrepreneurship Scholars

This pathway focuses on for-profit and non-profit business models as a way to create lasting community impact and sustainability both locally and globally. These students spend a full year designing and launching innovative companies rooted in social entrepreneurship.

## Scholars in Engineering & Management

Through project- and work-based learning in engineering and business, students in this pathway earn their Lean Systems Certification and are professionally prepared to lead companies that require the unique acumen to operate in the engineering and business fields.
